This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

535 Tables (76 large Genealogical) of the Royal and Noble Families of Spain, with those of many other Kingdoms and States in Europe, as far as they have been engrafted with them; beginning with that of the Condes de Lemos, which is deduced from Adam and Eve, *who are here delineated with a Pen, or represented in Figures, at the Root of the Pedigree, with the Creator raising her out of his Side.* This Table, consisting of several Sheets, is above six Feet long; and the Volume ends with Senores de Villa Vagneria Castillas. The 51st Table contains the Pedigree of the Kings of England, as they and their Nobles were united with Spain, from the Reign of King Richard I. to K. James I. There is quoted at the Bottom, as on every Table there likewise is, which will explain the Latin sentence written on the Inside of the Cover, the Author's Voucher or Authority, who for this is, Geronymo Henninges, en su Theatro Genealogico; it is dedicated by the Author Hieronymo de Otheo, from Palermo, the last of December 1616, to the Illust. &c. Don Francisco de Castro, Conde de Castro, Duque de Taurisano, Commendador de Hornarchos de la Orden de Santiago, Virrey y Capitain General per su Magdenesse Reyne de Sicilia; *whose Arms are delineated at large with a Pen on the first Page of the Book, and blazon'd in Gold in Colours on the Cover, which is of red Morocco, richly adorned and gilt:* There is also prefix'd a large Preface, distinguishing and explaining the said Pedigree, and a Table of their Names, Titles, &c. *all in Manuscript*, 5l 5s
